

the brand

‘TECHNIQS’ TO SUSTAIN LIFE

We are the leading global manufacturers of speciality vehicles for technology-intensive operations such as healthcare, enforcement, broadcast, defence and tactical command. We take pride in helping various agencies sustain lives using our mobile ‘techniqs’.

TECHNOLOGY ON WHEELS

While mobility and services-on-the-go have evolved as the buzzwords in every industry, technology innovations in these directions have helped bridge several gaps in sustaining lives on Planet Earth.

Our mobile 'techniqs' have brought in sea changes in the way emergency services are delivered across verticals such as healthcare, defence, fire rescue, disaster management, communication and law enforcement. Sustenance of lives have become far less complicated with our concept of 'technology on wheels', in spite of the hurdles like burgeoning population, increasing critical incidents, delayed service accessibility due to crippled infrastructure, etc. For the same reason, mobile technology services are now crucial to sustaining lives in the modern world.

PEOPLE & PRINCIPLES

Techniq International is committed to provide innovative mobile technology products and services to the global markets through our widespread branch-and-dealer-network. In every new vehicle we manufacture or convert for our esteemed clientele around the world, we ensure constant technology upgrades – and that's our most important differentiator.

OUR LEADERS

Ahmad Al Khatib
FOUNDER, SFFECO GLOBAL

It has been Mr.Ahmad Al Khatib's vision to bring cost-effective fire fighting means to Middle East, that saw the cornerstone to Saudi Factory for Fire Equipment (SFFECO), the first company ever in Middle East for manufacturing of Fire Fighting Equipment. He still remains committed to the society and has always been the backbone of the company, closely involved in its operations grooming it to new heights.

Hadi Al Khatib
Chairman/President & CEO, SFFECO GLOBAL

Streamlining and restructuring operations, Mr.Hadi Al Khatib has nurtured each subsidiary of SFFECO GLOBAL- SFFECO, LIFECO and Techniq International - to become independent profit centers. He aspires to take SFFECO GLOBAL to new levels by expanding product line, opening world-wide operations and spreading to other industries to bring products meeting global quality standards.

OUR VISION

Build products and services that are engineered to innovate and outperform, based on technology that ensures operational efficiency, cost-effectiveness and quality, thus attaining customer trust and serving the ultimate purpose of sustaining lives.

OUR MISSION

Become performance leaders in the global market by attaining profitable growth through superior customer service, innovation, operational excellence, quality, commitment and a dynamic and challenging work environment.

THE MAKING OF MOBILE TECHNIQS

INNOVATIVE DESIGN

The design and development of innovative vehicles begins with 3D drawings of the products. Each component of the vehicle is designed and inserted into the 3D model to validate the fit and functioning as per exact tolerances for fabrication and assembly to meet customer requirements accurately. In order to reduce maintenance requirements, lightweight materials are used wherever possible, decreasing the excessive stress that they might otherwise cause on the chassis. Each vehicle has a complete Bill of Materials documentation, which enables efficient reproduction of unlimited quantity of identical vehicles.

CUSTOM PRODUCTS

Vehicles are designed to adapt to a multitude of permutations as per the specifications required by the customers, including variations for chassis (Mercedes Sprinter, GMC Savana/Sierra, Ford, Nissan and Toyota, to name a few), engine types (diesel and gas), configurations (single or dual cot), oxygen tank (horizontal and vertical), cab walkthrough area (with or without), head-room space, medical item inclusions, and much more. Common components and design principles are standardized across vehicle platforms/product line-up to ensure:

- Operational efficiency with better control of delivery time and long-term purchase planning requirements
- Quality assurance of component products with the long-term product performance knowledge earned

QUALITY IN PRODUCTION

Our one-roof, state-of-the-art 30,000-sqm assembly line factory facility with a large warehouse equipped with modern resources - advanced equipment and skilled, experienced workforce - ensures efficient and quality-controlled production. Our products are subjected to the most stringent global industry standards tests.

OUR PRODUCT PORTFOLIO

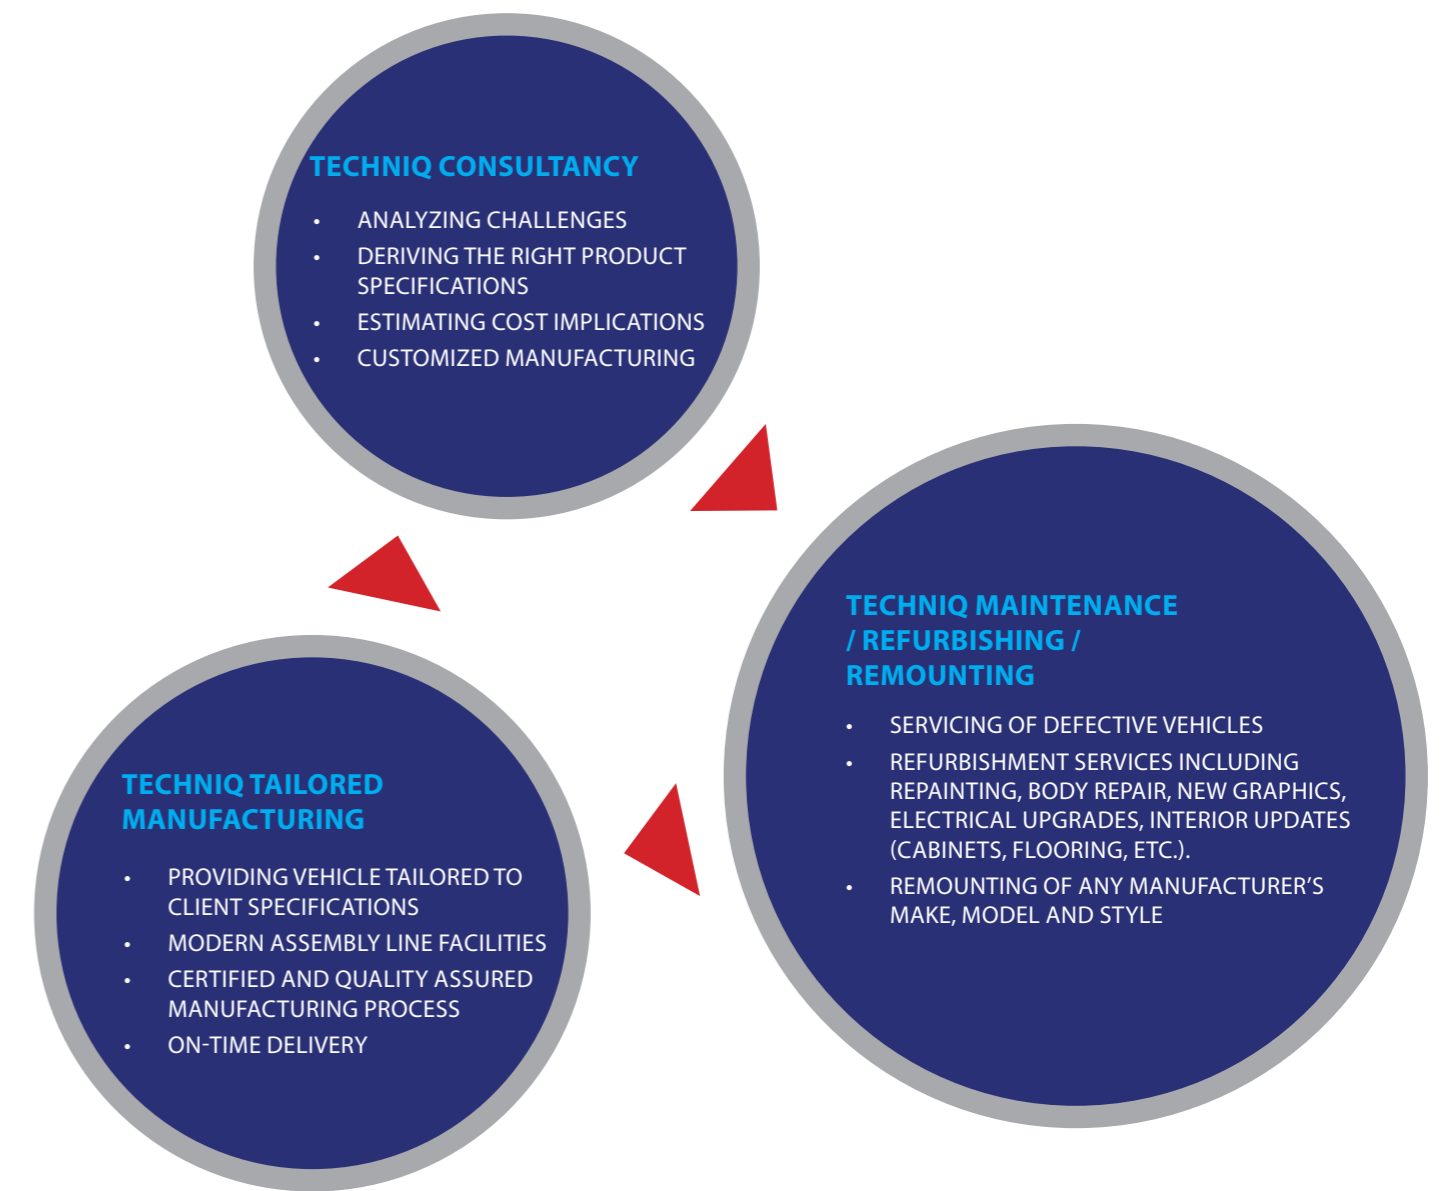

Techniq International delivers world-class industrial products and services built on cutting-edge technology to our clients around the world. We design, develop and assemble a wide range of advanced converted vehicles as per customer specifications, and closely following global standards like KKK. Our product portfolio includes:

- Ambulances - Type I, II, III
- Mobile ICUs
- Blood Donation Vehicles
- First Responders
- Rescue Vehicles
- Medicarts
- Mobile Mortuaries
- Transport Support Vehicles
- Mobile Office
- Speciality Vehicles

SERVICES THAT SUSTAIN LIVES & BUSINESS

Being a complete product and services provider, we can support clients through the entire life cycle of the project, right from the concept stage to tailored manufacturing and delivery, and eventually cost-saving support through maintenance or remounting or refurbishing. Our three-pronged services for the client's business sustenance include:

BUILDING TRUSTED RELATIONSHIPS

Our growing partnerships with our global clients spanning various geographies speak volumes about our success. The fact that they come back to us for challenging new requirements bears testimony to their trust in our services. We always strive to build long-term client relationships based on such mutual trust and respect.
