Unicorn

TECHNIQ'S UNICORN

Type II Ambulance

Techniq's Unicorn, its Type II Ambulance is built on a van-type chassis. They are used to transport patients who require Basic Life Support, though they can also be customized to equip for Advanced Life Support. The design facilitates optimum maneuverability, greater fuel efficiency and cost-effectiveness with interiors that can be easily sanitized. They are used most commonly by hospitals and the Ministry of Health. Unicorn is available as high-roof or low-roof variants.
